**Description / Action:**

There was a concern that there might be gaps between mating parts of the engine mount assemblies that might cause vibration in flight. The drawings/ IIN/ICA have been revised to add sealant to fill those gaps at assembly. There is no stock and no kits to rework. However, any D3684-XXX, D3685-XXX, and D3686-XXX assemblies currently in production should be assembled to the new drawings.

Kits should be shipped with the new IIN/ICA. Estimates should be updated to add a note about assembling the engine mounts with sealant.
